## SKILLS

- **Programming languages:** JavaScript, Python, C++ , CSS y HTML.
- **Tools & Frameworks:** Node.js, Express, MongoDB, MySQL, Socket.io, React.js, Tailwind, Bootstrap, Astro, JWT, APIs, Postman, Git, GitHub.

## PROFESSIONAL EXPERIENCE

### Web development

Jan 2022 - Present

*Freelance*

With a year of experience in the development of personal Backend projects, I have strengthened my programming and problem-solving skills. My most outstanding personal project is an e-commerce that I developed during my 'Backend Programming' course at CODERHOUSE. In addition, I have acquired competencies in Frontend development through courses at freeCodeCamp and self-taught learning, which allows me to have a comprehensive view of web development. My constant focus on learning and improvement has led me to explore new technologies and take on complex challenges in my projects.

### Cost and process analyst

Sep 2022 - Present

*Indave S.A.*

In charge of calculating and analyzing the costs of the final product (Ball valves destined for the Gas & Oil industry), as well as its direct and indirect production costs.

### Sales Engineer

Apr 2021 - Sep 2022

*Tecnologia Integral S.A.*

Preparation of sales and marketing plans for Atlas Copco industrial equipment adapted to the needs of the client, managing the entire sales and after-sales process.
